EMPLOYMENT

System Engineer   Infosys   August 2015 – Present

Developer

I work on Unibasic and UniData technologies. Our client is KLX which is an ecommerce company that sells product for flights. I am underneath Sales team. Here I have worked on consolidation of order like if some orders need to be delivered at a same time to a place we merge them together. I have also enhanced working of kit queues, kits are composed of many small products, this kits in turn are used to fill order, there were many issue with the data present and functionality of it.
I have worked here on data clean up as well.

Training

6 months rigorous trainings was given to us on Python, MySQL, PHP.

Internship   ParallelDots   June 2014 – July 2014
